

CAMPUS GATHERING GUIDELINES

Based on governmental directives and in consultation with our medical professionals, your pastors and deacons have developed the following guidelines for gathering on the Lakeview campus. If you do not feel safe in returning at this time, please feel free to continue to worship from home via livestream, without any sense of guilt and with the full support of your pastors and deacons.

To protect yourself and to show love for your neighbors by protecting them, you are strongly encouraged to follow these guidelines:

- Recognize that the coronavirus still presents significant risks to our health
- Stay home if you are a senior adult or are in another special risk category
- Take your temperature before arriving on campus and stay home if you have a fever
- Bring and wear a face covering (e.g. mask) while in the building
- Stay home with any of the CDC's coronavirus symptoms
- Stay home if recently in contact with a COVID-positive individual
- Keep a 6-foot distance from others at all times (inside and outside of the building)
- Avoid touching others (no hugs, fist bumps, high fives, elbows, etc.)
- Avoid gathering in the lobby before or after the service
- Sit only in seats as directed by ushers (available seating for individuals, couples, and families)
- Limit singing to only the praise team due to the extensive spread of "droplets" which results from congregational singing
- Overflow into Fellowship Hall if necessary (potentially be turned away if capacity is exceeded)
- Arrive only between 10:15am and 10:45am

Things we will not be doing initially:

- No Sunday School classes meeting on campus
- No child care provided (children are welcome in the Worship Center though)
- No hand-outs of any kind (e.g. bulletins, welcome cards, etc.)
- No "holding hands" at the conclusion of the service
- No passing of offering plates (boxes will be in the lobby instead)

Miscellaneous information:

- Pews, surfaces, door handles, bathrooms, etc. will be clean and disinfected
- Ventilation will be maximized by using HVAC fans and open doors
- Hand sanitizers will be generally available
- A small number of masks may be available depending on supply
